

Caring for Your Fairy Garden

- ▶ Keep pots indoors when outside temperatures are less than 40 degrees.
- ▶ Place a saucer under the garden to protect surfaces.
- ▶ Place the pot in or near a window.
- ▶ Give your plants water (about 1/4 - 1/2 cup) when the soil feels dry to the touch (about once per week).
- ▶ Move outside to a sunny area once temperatures are consistently above 50 degrees, either in the ground or in the pot, but be sure to keep watered.
